Jonny Whittle

Front-End Developer

Introduction

Front-End Developer with a proven ability to create and maintain better code for reusability. With a passion for both personal growth and for software development. I have recently finished a Diploma in Software Development from Code Institute, having already achieved a 2:1 degree in Graphic Design. I am ready to apply my passion for coding to a talented engineering team to develop quality solutions.

I'm looking for a permanent role in a great company working alongside other visionary creatives, having the chance to learn and improve my skills from senior developers and have a route to progress my career within the company. At the moment I am currently working on small websites for local companies as well as continuously learning and developing my knowledge of Languages.

Experience

Jan 2022 - Present

Leigh Festival

I co-founded Leigh Festival. With the aim of getting the community back together after covid. We hosted the event at Leigh RUFC, a rugby club that we both are on the committee of.

Key Responsibilities

• To create a website and marketing scheme that would inform people of the new event.
• Manage a team of volunteers during the planning stages and supervise each day of the event.

Key Achievements

• Over 3000 people attended the event over the 4 days.
• Website had over 25,000 hits, 1000 tickets sold on the website.
• We ended up making £18,000 profit, which all went back into the club.

www.leighfestival.uk

Jan 2020 - Present

Communications Director

At the start of 2020 I joined the board at my local rugby club.

Key Responsibilities

• Increase our outreach on social media.
• Create solutions to any issues that arise in the future.
• Create a team to manage and relay achievements and issues back to the board.

Key Achievements

• 88.6% Increase in Facebook page reach without using ads.

My Company

Avandor.co.uk

Jonny Whittle

Front-End Developer

Experience

Oct 2020 - Sept 2021

Table Service Website INACTIVE

In October 2020 Pubs and clubs weren't allowed to open unless they did table service only. My rugby club didn't have enough staff to have people waiting on and serving at the same time so I was chosen to come up with and create a solution.

Key Responsibilities

• Use Agile methodology to come up with the best way to create the solution.
• Create an easy to use system for both customers and employees.

Key Achievements

• Implemented a new system for ordering drinks via a table service app, that people of all ages were able to use with ease.

Nov 2019 - Present

Avandor

I created my own company while in university, initially I used it just to do graphic design jobs such as Logo's and Programs. When Covid hit I decided to change careers, I focused on technology and started to teach myself how to code. I subsequently completed and passed a 12 month coding course at Code Institute.

Key Aims

• To create a successful company that works with small local businesses, helping them to reach a wider market through great personalised websites.
• Be able to earn some side money while learning and evolving my skills.

Key Achievements

• Been able to meet up with influential people within Leigh and Wigan Council.
• Worked with several small companies, creating new websites for them or maintaining their current one with reusable, easy to read code.

Education

School 2010 - 2015	**Lowton Church of England High School** 8 GCSEs | A-Cs (including Maths & English)	
College 2015 - 2018	**St John Rigby 6th Form College** 3 AS Levels. 2 A Levels
